

Experiment No: 6

ARDUINO TO 16x2 LCD DISPLAY USING PROTEUS

AIM:

To write an Embedded C program to interface Arduino Uno and 16 x 2 LCD display using Arduino Uno and Proteus

SOFTWARE REQUIRED:

- Proteus 8 software.
- Arduino IDE software

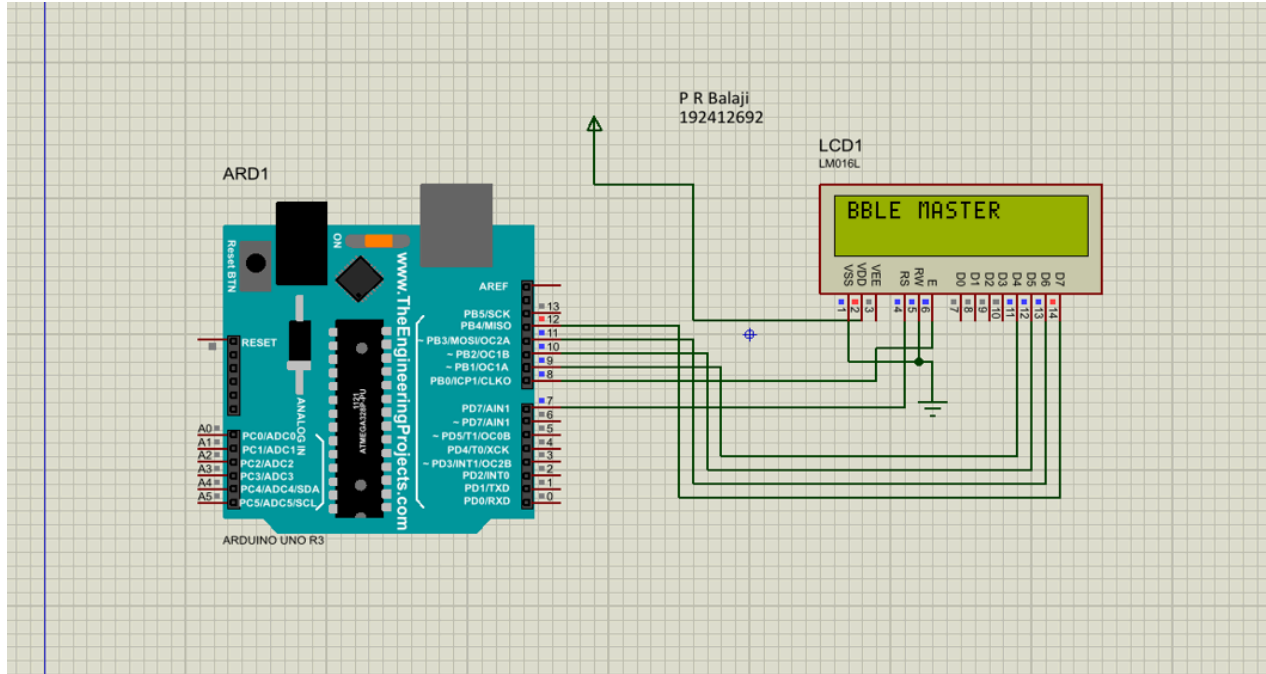

PROGRAM:

```
Arduino to 16x2 LCD Display using Proteus
#include <LiquidCrystal.h>
LiquidCrystal lcd (7, 8, 9, 10, 11, 12);
// your PWM numbers may be different
void setup() {
  lcd.begin(16, 2);
  lcd.print("Bubble Master");
}
void loop () {
  for (int i=0; i<13; i++)
  }
  lcd.scrollDisplayLeft();
  delay(700);
}
```

OUTPUT :

Experiment No: 6

ARDUINO TO 16x2 LCD DISPLAY USING PROTEUS

RESULT:

Thus the program has been successfully verified and executed.
